

# COMAP MCM-ICM: Submission Walk Through

The purpose of this article is to assist and guide students and advisors participating in *The Mathematical Contest in Modeling (MCM)* and *The Interdisciplinary Contest in Modeling (ICM)*. In the article, COMAP provides information about the PDF solution submission process.

During the team registration process you should have received an invoice/receipt that displays your **team number/control number** and your **advisor ID number**. You will need this information to complete the contest submission process.

An example of an invoice/receipt can be seen to the right with the Team Number and Advisor ID Number highlighted in red.

Be sure to keep a copy of this information because you will need it during the submission process.

Example:

Team Number: 2500001 Advisor ID: 100000

The purpose of this article is to assist and guide students and advisors participating in *The Mathematical Contest in Modeling (MCM)* and *The Interdisciplinary Contest in Modeling (ICM)*. In the article, COMAP provides information about the administration of the contests from registration through solution submission, as well as tips to ensure your contest experience is smooth, successful, and enjoyable.

### [Use of AI Tools in COMAP Contests](#)

This policy is motivated by the rise of large language models (LLMs) and generative AI assisted technologies. The policy aims to provide greater transparency and guidance to teams, advisors, and judges. This policy applies to all aspects of student work, from research and development of models (including code creation) to the written report. Since these emerging technologies are quickly evolving, COMAP will refine this policy as appropriate.

**Summary Sheet:** The summary is an essential part of your MCM/ICM paper and should appear as the first page of your solution report. The judges place considerable weight on the summary, and winning papers are often distinguished from other papers based on the quality of the summary.
